Skill Development Frequently Asked Questions

How and when will my child interact with other residents?

Residents have opportunities to interact with peers throughout the day, including during meals, group activities, transitions to and from school, group lessons, community outings, and weekend activities.

How does my child access the community?

When appropriate, residents in Monarch Boarding Academy North and South participate in structured community activities, generally at least weekly. Activities may include shopping, restaurants, parks, movies, recreational activities, and other community experiences based on individual interests and goals.

During the school day, students may also participate in field trips and prevocational experiences. Residents must be able to maintain an appropriate level of safety in the community to participate in outings.
